

The image shows three glass vials containing a yellowish liquid, likely a vaccine. Each vial has a white label with a blue horizontal line at the top. The central vial's label is in sharp focus and reads "Vaccine COVID-19" in bold black text. The vials on either side are blurred. In the foreground, there are several white syringes with blue markings, also out of focus. The background is dark, and the entire scene is framed by a thin white border.

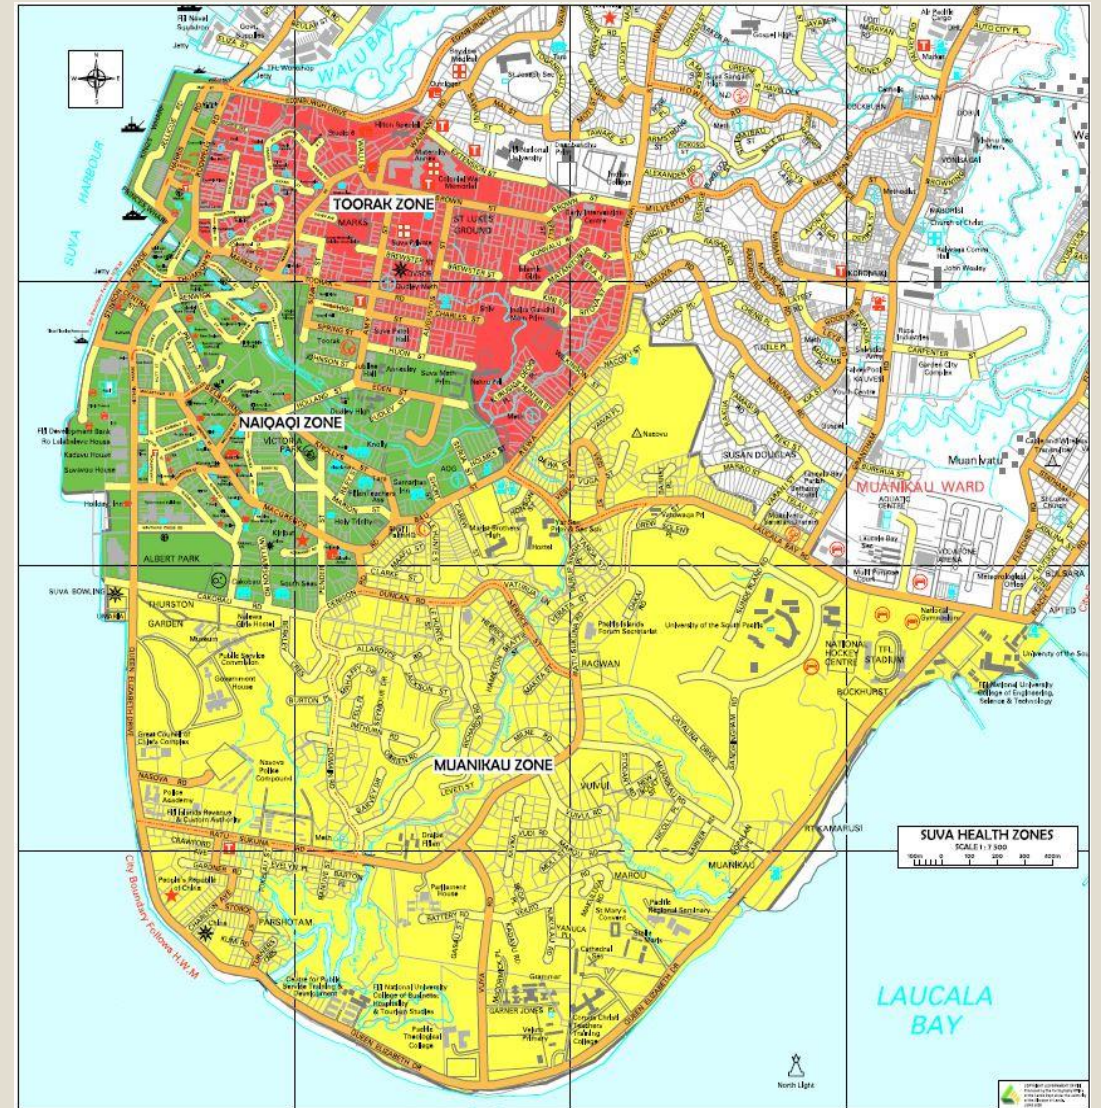

COVID19 VACCINES

Fiji 2020-2021

Geospatial Information Systems for Vaccination

- **National zoning completed while Min. Lands was with MoHMS in IMT**
- **Essential for coverage data for immunization**

Divisional Zone

Geographic Information Systems:

- **Linking this system to the Registration Platform**

(done through Digital Fiji)

- **For four main purpose:**

- i) Coverage Data for Immunization (Real Time)**
- ii) Adverse Events Following Immunization**
- iii) Cold Chain Systems (Functionality)**
- iv) Dashboard visualisation of information**

ArcGIS Survey123

ArcGIS Survey123 is a simple and intuitive form-centric data gathering solution. Create, share and analyze surveys in just three easy steps.
